

SILWESTHRIGE VISHWA ROSHEL SHAN

Software Engineer Intern

✉ roshel.shan23@gmail.com ☎ 0762755941 📍 Thalammahara, pannala

🌐 www.linkedin.com/vishwa-roshel 🔄 github.com/silwesthrige

PROFILE

Motivated Software Engineering undergraduate with a strong interest in Software Development, Artificial Intelligence, and Machine Learning. Passionate about building efficient, user-focused, and data-driven applications for real-world problems.

Skilled in programming, problem-solving, and modern development frameworks. Fast learner with strong adaptability and a commitment to continuous technical improvement. Seeking opportunities to apply software development and AI/ML knowledge in practical projects and professional environments.

SKILLS

Technical Skills

Frontend: Next.js, React.js, Flutter (Dart)

Backend: Node.js, Spring Boot, Python, Java

Databases: MySQL, MongoDB, Firebase, Oracle

Cloud & Deployment: Vercel, Railway, Docker

Tools & Practices: Git, Postman, XAMPP, Agile

Additional Skills: OOP, REST APIs, Problem Solving, Machine Learning Basics

Soft Skills

- Communication & Mentoring
- Team Collaboration
- Leadership
- Problem-Solving & Creativity
- Adaptability & Learning
- Time Management
- Resilience & Confidence

EDUCATION

2nd Year Undergraduate

BSc (Hons) in Computing - NIBM
(Coventry University UK Affiliated)

PROJECTS

The Tumeric Indian Cuisine Project [🔗](#)

07/2025 – 08/2025

Full Stack Application | Flutter, PHP, Firebase | 2025

- A complete restaurant management system with separate applications for customers, drivers, and administrators, designed to provide a smooth online food ordering experience.

Repositories:

- Customer App [🔗](#)
- Driver App [🔗](#)
- Admin Website [🔗](#)

- Role: Lead Developer — responsible for system design, UI/UX development, and database integration across all three platforms.

Hotel Management System [↗](#)

04/2025 – 05/2025

Desktop Application | C#, .NET, SQL Server | 2025

- A Windows-based hotel management application designed to simplify daily hotel operations and automate room booking, billing, and customer management.
- Role: Developer — responsible for designing the UI, implementing core logic, and integrating the database.

Assistive Service Robot for Elderly Care [↗](#)

12/2025 – 01/2026

(ESP32 + Computer Vision + Mobile Control)

- Built a smart robot for elderly assistance and safety monitoring
- Integrated ESP32 + ESP32-CAM for control and vision
- Developed a custom Flutter mobile application for remote control and monitoring
- Implemented **YOLO-based object detection** for intelligent camera vision and environment awareness
- 🏆 Secured **1st Place** in university-level competition (Linkedin [↗](#))

Petshop Management System [↗](#)

Pet Shop Management System – Enterprise Web Application

| React | Spring Boot | JWT | MySQL

- Developed a secure, scalable web application to replace manual pet shop management processes, improving operational efficiency and reducing errors through a modern full-stack architecture.

Role : Full-Stack Developer

- Analysed business requirements and designed a web-based solution.
- Developed frontend and backend features using React and Spring Boot.
- Implemented secure authentication, database integration, and REST APIs.

Smart Job Matching Application (Ongoing) [↗](#)

05/2026

AI-Powered Recruitment & Career Recommendation Platform | React.js | FastAPI | PostgreSQL | Machine Learning |

- Developing an AI-powered platform for intelligent job matching and career recommendations
- Building scalable backend systems, APIs, and modern responsive interfaces
- Implementing resume analysis and skill-based matching functionalities
